Cooling System Services

The anti corrosion and lubrication qualities in antifreeze breaks down over time and needs to be flushed out of the cooling system. This service helps prolong the life of your vehicles radiator, water pump and heater core and most importantly the engine. Most manufacturers recommend this service every other year or 30,000 miles. We perform the following:

- Inspect radiator, belts and hoses
- Install cleaner, run vehicle and flush system
- Install conditioner and refill system
- Check thermostat operation and check for leaks

Normally runs \$65.00 to \$75.00 depending on vehicle
